Peat, Jennifer: Health Science Research: A Handbook of Quantitative Methods. (NSW: 2001) H62/10

This book will assist clinicians and health workers who are undertaking research. Chapters cover: Reviewing the Literature, Planning the Study, Conducting the Study, Analysing the data and reporting the Results.

An excellent tool to demystify the sometimes intimidating area of research.

Osborn, DeWitt, First & Zenel: Pediatrics. (USA: 2005)

WS 200/29

This resource delivers practical, clinical coverage of basic science, health promotion, disease prevention, general and chronic medical care, newborn and adolescent care, mental health care, diagnostic and therapeutic interventions for the paediatric patient.

Hall, Schmidt & Wood: Principles of Critical Care (3rd ed.) (USA: 2005)

WX 218/40

A definitive text which achieves two goals: the explication of the complex pathophysiology common to all critically ill patients, and the in-depth discussion of procedures, diseases and issues integral to the care of the critically ill.

Tschudin, Verena: Ethics in Nursing: the caring relationship. (3rd ed.) (UK: 2003)

WY 85/5a

For nurses who practice primary nursing and have a special relationship with their patients this resource focuses on an ethic of care, while addressing current pressing issues in nursing.

Contents pages from ProQuest – Health & Medical Database

To request any of the articles complete the Interactive Journal Request Form on the Library Intranet page or complete the attached PDF version & fax to 4634 – 3940.

One article per request & don't forget to sign before you fax
