

SOUTH WESTERN SYDNEY REGIONAL TRAUMA REGISTRY REPORT

1995 - 1999

A project by the Trauma Department, Liverpool Hospital

CONTENTS

	Page
Index to Contents	2
Executive comments from Director of Trauma Services	5
Introduction from Erica Caldwell Trauma Data Manager	7
NSW Trauma System	12
Chapter 1	
Overview of Admissions to South Western Sydney Area Health Service	
Executive Summary and Recommendations	15
Explanation of Categories and Inclusions	16
Number of Trauma Admissions	17
Age Distribution for All Injury Admissions to SWSAHS	18
Mechanism of Injury Each Year for Trauma Admissions to SWSAHS	19
Weekday and Time of Arrival - Liverpool	20
Weekday and Time of Arrival - Bankstown	21
Weekday and Time Arrival - Campbelltown	22
Weekday and Time of Arrival - Fairfield	23
Weekday and time of Arrival - Bowral	24
Weekday and Time of Arrival - Camden	25
Disposal of Patients from Emergency Department – Major Category Injuries	26
Disposal of Patients from Emergency Department – Minor Category Injuries	27
Length of Stay in Hospital: Major Category Injuries	28
Chapter 2	
Overview of Admissions Liverpool Hospital	
Executive Summary and Overview	29
Synoptic View of Admissions and Transfers to Liverpool Hospital	30
Mechanism of Injury Annually for Total Admissions to Liverpool Hospital	31
Place of Injury Occurrence - Major	32
Place of Injury Occurrence - Minor	33
Weekday Comparison: Falls, Road Trauma and Interpersonal Violence	34
Type of Injury Admitted, Cause, Number of Patients,	35
Pre-hospital Triage Category, Age and Sex, Mode of Arrival	36
Analysis of trauma by Age, ISS and Trauma type	38
Origin of Patients Admitted to Liverpool Hospital	39
Bypass Failure - Transfer to Liverpool Hospital - 1999	40
Drug or Alcohol Links with Trauma	42
Chapter 3 Pre-hospital Care	
Executive Comments	43
Photo of Helipad and Ambulance Bay	44
Ambulance Protocol for Pre-hospital Triage of Trauma for Adults and Children	45
Ambulance Transport Decision Codes- Mode of Arrival	46
Pre-hospital Transport Decisions, Mode of Transport,	47
Transport Decision Codes for Patients Brought Directly to Liverpool Hospital	
Pre-hospital Cardio-Pulmonary Resuscitation:	48
Transport Decision, Body Region of Injury, Age group and Outcome, Airway	
Airway Control: Attending Officers, Age Groups, Endotracheal Intubation	49
Fluid Administration: Attending Officer Volume Blunt/Penetrating Trauma	50
Administration of Medication; Thoracocentesis in pre-hospital setting	51
Military Anti Shock Trouser Device (MAST)	52
Liverpool Hospital Serious Injuries (ISS \geq 16):Transport Mode	53
Inter hospital Transfers to Liverpool	54

Chapter 4 Types of Injury Admitted to Liverpool Hospital

Executive Comment	56
Head Injury - Sex Distribution; Age and ISS; Type of Trauma	57
Mechanism of Injury; Origin; Outcome; Pre-hospital intervention; ISS	58
Status on discharge; GCS on arrival; GCS and Outcome; Craniotomy for EDH / SDH	59
Body Region and Score for All Injuries Sustained by Head Injured Patients	60
Injury Description and Score for Head Injuries	61
Thoracic Injuries - Sex Distribution; Age and ISS; Type of Trauma	62
; Mechanism; Origin of Arrival; Survival Outcome; Pre-hospital intervention; ISS	63
Body Region and Score for All Injuries Sustained by Thoracic Injured Patients	64
Injury Description and Score for Thoracic Injuries	65
Abdominal Injuries - Sex Distribution; Age and ISS; Mechanism of Injury	66
Type of Trauma; Origin; ISS; Outcome; Pre-hospital; Investigations	67
Body Region and Score for All Injuries Sustained by Abdominal Injured Patients	60
Injury Description and Score for Abdominal Injuries	68
Organ Involved at Laparotomy; Laparoscopy	70
Vascular Injuries - Sex Distribution; Age and ISS; Type of Trauma	71
Mechanism of Injury; Pre-hospital intervention; Origin; ISS; Outcome.	72
Body Region and Score for All Injuries Sustained by Vascular Injured Patients	73
Injury Description and Score for Vascular Injuries	74
Orthopaedic Injuries - Number Each Year in Major and Minor category	75
Specialty of Admissions to Each Hospital-Major/Minor categories	76
Urban/Rural Hospitals Disposition and Destination	78
Road Trauma - Sex; Mechanism and Sex; Age and Sex for Role; ISS for Mechanism	79
Outcome; ISS Classification; Discharge Status.	80
Use of Restraint in Motor Vehicle Accidents	81
Child Pedestrians	82
Burns Injuries - Age and Place; Hospital; Year and Place; ISS; Disposal from ED	83
Penetrating Injuries - Major and Minor categories	84
Sex and Age; Mechanism; Human Intent	85
Survival; Direct or Transfer; Predominant body region; Pre-hospital Intervention	86
Penetrating Abdominal Injury Undergoing Laparotomy; Diagnosis for Minor injuries	87
Elderly Patients With Rib Fractures	88
Chapter 5 Management and Diagnostic Work-up	
Executive Comment	89
Activation of Trauma Team Response at Liverpool Hospital	90
Interventions During Resuscitative Phase: CPR - Airway Intervention	91
Diagnostic Interventions in Resuscitative Phase: Head CT - Arch Aortogram	92
Abdominal Trauma- Diagnostic Tests: Diagnostic Peritoneal Lavage, abdominal CT	93
Laparotomy- Therapeutic and Non-Therapeutic	94
Operations: Laparotomy, Long bone Fixation, Craniotomy for Acute EDH or SDH,	95
Thoracotomy	96
Laparotomy - Craniotomy	97

Chapter - 6 Performance Indicators	
Executive comment	99
Introducing the Concept of Performance Indicators	100
Description of meaning of Performance Indicators in Each Phase of Care	101
Overview Results: Performance Indicators - Liverpool Hospital 1995 - 1999	104
Pre-hospital Phase: Bypass of Serious Injuries - Intubation for Unconscious Patient - Time in Scene - IV Cannula and Volume Administered	105
Resuscitative Phase: Retrieval Team Turnaround Time - Transfer Within 3 hours Unconscious Patient Intubation - Blood Administered - Explore Penetrating Wound - Time in CT Scanner - Head CT for GCS <13	106
Definitive Management Phase: Representation - Appropriate Thrombo-embolic Prophylaxis - Hypothermia - Time to Long Bone Fracture Fixation - Time to Fixation of Open Fractures - Non-therapeutic Laparotomy - Craniotomy: Time from Injury - Craniotomy: Time from Presentation - Kept in Major Trauma Service - Joint Dislocation: Time to Reduction - Unstable Patient: Time to Laparotomy - Ischaemic limb: Time to Re-vascularization - Unplanned Return to Theatre - Unplanned Return to Intensive Care Unit - Documentation of Temperature in OT - Haemoglobin >85mg/dL	107
 Chapter - 7 Injury Severity Scores	
Executive Comment	109
Background to Injury Severity Scores	110
ISS stratified: Liverpool, Urban, Rural	111
Injury Severity Scores for Body Regions: Each hospital	112
Survival Outcome: Less serious (ISS 1-15) and More serious injuries (ISS 16-75)	115
Survival Outcome: Urban and Rural Hospitals	116
Urban and Rural Deaths: Body Region Injuries Sustained	117
 Chapter - 8 Outcome Measures	
Executive Comment	119
Deaths Following Trauma: SWSAHS - Liverpool Hospital	120
Mechanism, Day of Death, Age	122
Injury Severity and Survival	123
Statistical Models for evaluating trauma care: TRISS	124
MTOS, TRISS Regression Weights	125
TRISS, SMR, Z and W statistic	126
Comment and Suggestions for Further Reading	127
Mortality Outcome Analysis:	
Liverpool Hospital, SWSAHS, Urban and Rural Hospitals	128
MTOS	130
Stratified for Age and ISS:	
Blunt Trauma - Penetrating Trauma - Falls - Road Trauma	131
Deaths at Urban and Rural Hospitals	133
 Chapter 9 - Complications: Liverpool Hospital	
Age Group for Occurrence	136
 Appendices	
Major Injury Data Collection Form	142
Screen View of Registry	146
Instructions for Coders and Data Dictionary	147
Complication List and Definitions	170
Publications List: Liverpool Trauma Department	176
